Identify the center and radius of each circle. Then sketch the graph.

1) $(x-3)^2 + (y-3)^2 = 36$ Center (3,3) Radius 6

2) $(x+6)^2 + (y-4)^2 = 4$ Center (-6,4) Radius 2

3) $(x+2)^2 + y^2 = 16$ Center (-2,0) Radius 4

4) $(x+1)^2 + (y+5)^2 = 9$ Center (-1,-5) Radius 3

Equations of Hyperbolas ws-2 Day 4 Digital Learning - classifying conics ws- Hyperbola basics answers Hw: WS-1 classifying conics, on equations worksheets (hyperbola and ellipse) do every other left over problem (hyperbola every other odd , ellipse every other even). Go to conic flower project and sign up. WS-1 Classifying conic sections 3-20 we are now on unit 6 matrices Please fill in the form below so I know who is working with who. There will be one odd person out and that person I will assign to a random group. Once we have our groups I'll assign dimensions. The first round of flower project will be due on the 27th. I will be putting more information up soon. Above you will find some helpful instructions. You may click on to get to your testing site. The password if your ID number. If you move away from the test it will kick you out. A 4 function calculator if provided in the testing window. Don't fret you got this!! Message me on remind if you are having issues. This is a review activity to use at the end of the conic section unit after studying parabolas, ellipses, and hyperbolas. It also works well as a formative assessment after conic sections have been studied. The problems require student to write equations, in standard form, for hyperbolas, ellipses, and parabolas when given a variety of situations. Some problems require students to complete the square. Other problems provide clues about vertices, foci, directrix line, axes descriptions and/Page 2This is a FREE product meant for use as part of a unit on Conic Sections, in an Algebra 2 or College Algebra level class! The first page is a spiral review of prior knowledge about conic sections, including equations and graphs of circles, standard form of circles, and graphing ellipses. The second page contains guided notes about parabolas that open up, down, right, and left. The notes are in a "four square" format, a useful tool to help students better organize and distinguish between the
